

# 8 Tips for a Generous Heart that's CyberSmart

## 1. Lock Your Mobile Device.

When giving online from a mobile app, lock your device by using a PIN number or fingerprint ID.

## 2. Make Sure You Give on a Secure Network.

Only use secure networks and encryption when joining Wi-Fi accounts that are not your own.

## 3. Don't use unencrypted WiFi networks.

And if you do use free WiFi hotspots, try not to access highly personal sites like your bank accounts.

## 4. Use password manager.

That and two-factor authentication keeps your online data safe.

## 5. Secure your Wi-Fi Network.

Your home's wireless router is the primary entrance for cybercriminals to access all of your connected devices. Secure your Wi-Fi network and your digital devices by changing the factory-set default password and username.

## 6. Don't make passwords easy to guess.

Do not include personal information in your password such as your name or pets' names. This information is often easy to find on social media, making it easier for cybercriminals to hack your accounts.

## 7. Unique account, unique password.

Having different passwords for various accounts helps prevent cyber criminals from gaining access to these accounts and protect you in the event of a breach. It's important to mix things up - find easy-to-remember ways to customize your standard password for different sites.

## 8. Be wary of personal information requests.

Phishing attacks use email or malicious websites to infect your machine with malware and viruses in order to collect personal and financial information. We never request passwords, Social Security numbers or bank account information via email.
